What Is JADC2?

Joint All-Domain Command and Control (JADC2) is the Department of Defense's (DOD's) concept to connect sensors from all of the military services—Air Force, Army, Marine Corps, Navy, and Space Force—into a single network. Traditionally, each of the military services developed its own tactical network that was incompatible with those of other services (i.e., Army networks were unable to interface with Navy or Air Force networks).

The Joint All-Domain

Operations concept, thus, provides commanders access to information to allow for simultaneous and sequential operations using surprise and the rapid and continuous integration of capabilities across all domains—to try to gain physical and psychological advantages and influence and control over the operational environment.

foreign internal defense: (DOD) Participation by civilian and military agencies of a government in any of the action programs taken by another government or other designated organization to free and protect its society from subversion, lawlessness, and insurgency. Also called FID. (JP 1-02)

Spymaster: My Life in the CIA (2005, autobiography)

In the mid-1990s, a report prepared by the CIA looked into the assassination of former Belgian Socialist Party leader Andre De Weert. The murder in 1991, is getting a fresh look after the Mossad links to neo-Nazi, anti-Muslim gangs, underpinnings, that are masquerading as legitimate political groups in Belgium, the Netherlands, and other countries. The report, known as the ATLAS Report, is of great interest following the recent massacre of Norwegian islanders on Utoya island and a deadly bombing in downtown Oslo.

The ATLAS Report's detailed investigation into global financial scandals dovetails with the rise of Egypt's Muslim Brotherhood that has replaced Mubarak represented a "Talmudic" strategy of international players. The cover-up was highlighted in a recent seminar by the Jakarta Foreign Correspondents' Club.

Before Coors' murder, the report details a "radio-style" strategy of right-wing terrorist attacks which were initially blamed on the Communist Party. The report was the center of the next phase of the Gladio cells. However, the report notes that other top Belgian politicians were part of a "deep state" that brought down their government. The report also mentions a "Augusta helicopter" and "helicopters" including "friendly" ones.

NUCLEAR WAR IS SUCH AN EMOTIONAL SUBJECT THAT MANY PEOPLE SEE THE WEAPONS THEMSELVES AS THE COMMON ENEMY OF HUMANITY.

WORLD WAR I BROKE OUT LARGELY BECAUSE OF AN ARMS RACE, AND WORLD WAR II BECAUSE OF THE LACK OF AN ARMS RACE. IT IS IMPERIAL FROM ALMOST ANY POINT OF VIEW TO REFUSE TO DEFEND YOURSELF AND OTHERS FROM VERY GRAVE AND TERRIBLE THREATS. FROM A SCIENTIFIC PERSPECTIVE THERE IS SOME INDICATION THAT A NUCLEAR WAR COULD DEplete THE EARTH'S OZONE LAYER OR, LESS LIKELY, COULD BRING ON A NEW ICE AGE - BUT THERE IS NO SUGGESTION THAT EITHER THE CREATED ORDER OR MANKIND WOULD BE DESTROYED IN THE PROCESS.

WHAT ARE WE TO MAKE OF THESE INSTITUTES AND ORGANIZATIONS? AFTER EXAMINING A GOOD DEAL OF THEIR WORK, WHILE I WAS IN THE GOVERNMENT AND NOW THAT I AM OUT OF IT. I HAVE COME TO THE CONCLUSION THAT THEIR MOST IMPORTANT FUNCTION IS TO JUSTIFY AND EXTEND THE INTERESTS OF THEIR EMPLOYERS.

ly and a policy researcher at RAND, a nonprofit research organization. “The findings provide support for policies that further expand vaccine administration to enable a larger proportion of the nation's population to benefit.”

The study estimates the economic value of the lives saved during the study period to be between \$625 billion and \$1.4 trillion. Through the end of 2020, the U.S. federal government had allocated \$13 billion dollars for vaccine development and manufacturing

Marco Hafner
Senior Economist
Source: RAND News Release

“Public health messages and communication strategies to address vaccine hesitancy should be tailored through authentic community engagement. Messaging about COVID-19 vaccines should first acknowledge systemic racism a justifiable reason for mistrust before providing transparent information about the vaccine, including specific information about efficacy and safety.”

Laura M. Bogart
Senior Behavioral Scientist
Source: RAND News Release

“A globally coordinated multilateral effort to fight the pandemic is key, not only from a public health perspective but also an economic one. If too many countries follow a ‘vaccine nationalism’ approach regarding the development, production, and distribution of COVID-19 vaccines, it could seriously hurt globally equitable access for those most at risk.”
